

Buffalo Bore's Heavy .35 Remington delivered this group at 50 yards with iron sights.

Buffalo Bore's Heavy .35 Remington 220-grain FP and .38-55 Heavy 270-grain hard-cast LFN.

Marlin 336T for several years to no avail. Then one Labor Day weekend I walked into a small gun shop in the little mountain town of Cascade, Idaho, and noticed one on the back shelf. When I asked about it the clerk said, "Oh you don't want that one; it's not a .30-30, it's a .35 Remington." I was most happy to take it off his hands at a bargain price.

Buffalo Bore is now offering serious Heavy .38-55 and .35 Remington loads and if there are better cartridges for the deep woods deer hunter, I don't know what they are. In the 20" Marlin 336 .35 Remington with a Lyman aperture sight, Buffalo Bore's Heavy .35 Remington 220-grain JFP clocks out at 2,089 fps and places three shots in 1¼" at 50 yards. Three loads are offered for the often finicky .38-55, a 255-grain JFN, and two 270-grain Hard Cast LFN rounds, one at .378" and the other .380". The former clocks out at 1,980 fps from a 24" Marlin and puts three shots into 1" at 50 yards, while the two LFN loads go 1,878 fps and 1¼" and 1,884 fps and 7/8", respectively, both from the same Marlin.

The Lee Deluxe Pistol Die Set

Exclusive Powder-Through-Expanding Die lets you expand and charge your case at the same time.

Collet held decapper is perfectly centered and moves if it hits any obstruction — almost totally eliminating breakage common with other brands.

Finger adjust bullet seater with floating universal seating plug. None more convenient or as accurate.

Contour assembly ground carbide sizing die sizes without lubrication and the objectionable "belt mark" found with others.

New longer threads to fit popular progressive presses.

Shell holder, powder measure and charge table.

All this plus the world's most popular crimping die. The Lee Factory Crimp Die provides the most accurate, secure crimp; then post sizes the cartridge with its super hard smooth carbide ring. Any case passing through the Factory Crimp Die will chamber properly and reliably.

IN THE MOST POPULAR SIZES
9mm Luger · 38/357 Magnum
40 S&W / 10mm Auto
44 Special / 44 Magnum
45 Colt · 45 ACP

LEE CLASSIC TURRET PRESS & DELUXE PISTOL DIE SET A PERFECT MATCH

The Lee Classic Turret Press

The nicest most convenient press ever made.

Every convenience detail has been thought of on this beauty. Absolutely every spent primer is captured and directed to your trashcan with the attached PVC tube. The balance lever is completely adjustable right or left, as well as start and stop position. The power is transmitted through a solid steel compound toggle linkage. A cast iron base guides the massive ram and holds the 3 steel columns in perfect alignment. Dies are secured in an instant change turret that is surrounded by a solid steel ring with 8 rifle type lugs. Automatic turret advance eliminates hand motion and can be deactivated in an instant. Priming is with the Lever Priming System [LPS]. This works so well you will want to prime on the press.

Extra station The fourth station is the perfect home for the Lee Factory Crimp Die.
